YOU WILL LEARN AND EXPERIENCE STRATEGIES PROVEN TO:

- Design and Deliver Lessons that maximize student learning
- Increase student participation
- Heighten student interest in learning
- Boost memory formation and retention
- Increase student confidence and competence with difficult content
- Inspire Motivation in students

ENGAGE & EMPOWER STUDENTS IN LEARNING

Design lessons that amplify students' connections with new content and deepen their thinking by tapping into brain-based strategies that promote cognition.

You'll learn proven methods to engage students with their learning, remember what they're taught, and develop a more can-do attitude about school and education.

Discover how you can create an intellectually engaging, down-to-business, and successful classroom culture built on safety, support, and belonging.
